

## **V. SUMMARY AND RECOMMENDATIONS**

---

A Phase I historic resources survey was conducted for the proposed Route 9 and Road 319 Intersection Improvements Project. The purpose of this survey was to identify all buildings and structures, fifty years in age or older, situated within the Area of Potential Effect (APE) for the project. One (1) property within the APE was previously identified but no eligibility recommendation was given.

Recent fieldwork resulted in the identification of seven (7) additional resources meeting the fifty year old or older requirement for evaluation within the APE; S-10124 to S-10130. The National Register Criteria for Evaluation were then applied to the previously identified resource (S-3156) and these seven (7) resources. Preliminary eligibility recommendations for all eight (8) properties are not eligible.

This report includes Delaware Cultural Resource Survey forms for one (1) previously and seven (7) recently surveyed properties.
